

# LNPT<sup>™</sup> KONDUIT<sup>™</sup> COMPOUND WTF2C

## DESCRIPTION

LNP KONDUIT WTF2C compound is based on Polybutylene Terephthalate (PBT) resin containing mineral and glass fiber. Added features of this grade include Thermally Conductive, Electrically Insulative, CTI-0 and having a stable di-electric property over a wide temperature range.

GENERAL INFORMATION	
Features	Good Processability, Dielectrics, High temperature resistance, Thermally conductive/Electrically isolative, No PFAS intentionally added
Fillers	Glass Fiber, Mineral
Polymer Types	Polybutylene Terephthalate (PBT)
Processing Techniques	Injection Molding

INDUSTRY	SUB INDUSTRY
Automotive	Automotive Interiors, Automotive Under the Hood
Electrical and Electronics	Electrical Components and Infrastructure
Hydrocarbon and Energy	Electric Vehicle

## TYPICAL PROPERTY VALUES

(1) The information stated on Technical Datasheets should be used as indicative only for material selection purposes and not be utilized as specification or used for part or tool design.

(2) Measurements made from laboratory test coupon. Actual shrinkage may vary outside of range due to differences in processing conditions, equipment, part geometry and tool design. It is recommended that mold shrinkage studies be performed with surrogate or legacy tooling prior to cutting tools for new molded article.

(3) Injection Molding parameters are only mentioned as general guidelines. These may not apply or may need adjustment in specific situations such as low shot sizes, large part molding, thin wall molding and gas-assist molding.

## ADDITIONAL PRODUCT NOTES

No PFAS intentionally added: The grade listed in this document does not contain PFAS intentionally added during Seller's manufacturing process and is not expected to contain unintentional PFAS impurities. Each user is responsible for evaluating the presence of unintentional PFAS impurities.
