

## LEXANTM FR RESIN DMX1214

## **DESCRIPTION**

LEXAN DMX1214 is a standard flow Polycarbonate (PC) copolymer resin. Available in both transparent and custom colours, this grade is a good candidate for 5G related devices. Added features of this grade include: Improved Scratch Resistance and Improved Dielectric Performance (lower Df).

| GENERAL INFORMATION   |  |
|-----------------------|--|
| Features              | Good Processability, Dielectrics, IR Transparent, Scratch Resistance, Transparent/Translucent, No PFAS intentionally added |
| Fillers               | Unreinforced   |
| Polymer Types         | Polycarbonate (PC)   |
| Processing Techniques | Injection Molding  |

| INDUSTRY                   | SUB INDUSTRY          |
|----------------------------|-----------------------|
| Automotive                 | Automotive Interiors  |
| Consumer                   | Personal Accessory    |
| Electrical and Electronics | Electronic Components |
| Industrial                 | Flectrical            |

## **TYPICAL PROPERTY VALUES**

Revision 20231109

| PROPERTIES                                  | TYPICAL VALUES | UNITS      | TEST METHODS        |
|---|----------------|------------|---------------------|
| MECHANICAL (1)                              |                |            |                     |
| Tensile Stress, yld, Type I, 50 mm/min      | 77             | MPa        | ASTM D638           |
| Tensile Stress, brk, Type I, 50 mm/min      | 64             | MPa        | ASTM D638           |
| Tensile Strain, yld, Type I, 50 mm/min      | 7              | %          | ASTM D638           |
| Tensile Strain, brk, Type I, 50 mm/min      | 92             | %          | ASTM D638           |
| Tensile Modulus, 50 mm/min                  | 2830           | MPa        | ASTM D638           |

- (1) The information stated on Technical Datasheets should be used as indicative only for material selection purposes and not be utilized as specification or used for part or tool design.
- (2) Measurements made from laboratory test coupon. Actual shrinkage may vary outside of range due to differences in processing conditions, equipment, part geometry and tool design. It is recommended that mold shrinkage studies be performed with surrogate or legacy tooling prior to cutting tools for new molded article.
- (3) UL Ratings shown on the technical datasheet might not cover the full range of thicknesses and colors. For details, please see the UL Yellow Card.
- (4) Injection Molding parameters are only mentioned as general guidelines. These may not apply or may need adjustment in specific situations such as low shot sizes, large part molding, thin wall molding and gas-assist molding.
