ULTEM™ RESIN 1000P

DESCRIPTION

ULTEM 1000P Resin is an unreinforced amorphous polyetherimide (PEI) powder. This powder is available with an average particle size (D50) of 350 micron. It may offer a high glass transition temperature (Tg) of 217°C. Features are excellent mechanical, electrical and dimensional properties up to high temperatures. The material may offer very good chemical resistance for an amorphous material and is inherently flame retarded. The material is RoHS Compliant. The base material is transparent amber colored.
