# LNPTM ELCRESTM SLX1291TIB

#### DESCRIPTION

LNP ELCRES SLX1291TIB is based on Polycarbonate (PC) copolymer resin. It is an injection moldable, weatherable product that offers enhanced UV stabilization, impact durability and can reduce "interior" heat build up in the article or part by selectively blocking the near infra-red region of the sunlight. This medium flow (19 MFR) resin provides good processability with added mold release. SLX1291TIB is targeted for a broad range of electrical components in the Building and Construction, Industrial, Infrastructure, Medical Facility Infrastructure and Energy storage applications.

GENERAL INFORMATION	
Features	Aesthetics & Visual effects, Transparent, Ductile, Good Mold Release, Good Processability, Weatherable, Colorable, Easy Flow, Enhanced Low Temperature Impact, Weatherable/UV stable, No PFAS intentionally added
Polymer Types	Polycarbonate (PC)
Processing Techniques	Injection Molding

(1) The information stated on Technical Datasheets should be used as indicative only for material selection purposes and not be utilized as specification or used for part or tool design.

(2) Measurements made from laboratory test coupon. Actual shrinkage may vary outside of range due to differences in processing conditions, equipment, part geometry and tool design. It is recommended that mold shrinkage studies be performed with surrogate or legacy tooling prior to cutting tools for new molded article.

(3) Injection Molding parameters are only mentioned as general guidelines. These may not apply or may need adjustment in specific situations such as low shot sizes, large part molding, thin wall molding and gas-assist molding.
